

Day 1 - SQL Notes and Practice Questions

Technology Used: Microsoft SQL Server (MSSQL)

Topics Covered: CREATE DATABASE, CREATE TABLE, INSERT INTO, SELECT, WHERE, ORDER BY

Day 1 Notes

Topic	Explanation
CREATE DATABASE	Used to create a new database.
USE	Selects the database to work with.
CREATE TABLE	Creates a new table with columns and data types.
INSERT INTO	Adds data into a table.
SELECT	Retrieves data from a table.
WHERE	Filters rows based on conditions.
ORDER BY	Sorts results in ascending or descending order.

Example SQL Queries

```
CREATE DATABASE SQL30Days; USE SQL30Days; CREATE TABLE Employees ( EmpID INT PRIMARY KEY, Name VARCHAR(50), Age INT, Department VARCHAR(50), Salary INT ); INSERT INTO Employees VALUES (1, 'Rahul', 22, 'IT', 45000), (2, 'Aman', 25, 'HR', 35000); SELECT * FROM Employees; SELECT Name, Salary FROM Employees WHERE Salary > 40000 ORDER BY Salary DESC;
```

Practice Questions

1. Show all employee details from the Employees table.
2. Show only employee names.
3. Display employees whose salary is greater than 40000.
4. Show employees from the IT department.
5. Sort employees by salary in descending order.
6. Show employees whose age is less than 25.
7. Display only Name and Department columns.
8. Show employees whose salary is between 35000 and 50000.
9. Show employees whose department is HR.
10. Display employees sorted by age.
